

Course Calendar

JMS 302: Hacking the Media, Fall 2014

The following lays out the basic structure of the class. The schedule is subject to change based on the needs and progress of the course. Changes to the schedule are announced in class; even if you are absent for the announcement, you are still responsible for the assignment and must get it from a classmate.

Date		Topics	Reading	Homework
8/19	1	Introduction, setup, Intro to the command line		Create GitHub.com account (free level).
8/21	2	Your first programs GitHub	http://bit.ly/hacking-1	Week 1: <ul style="list-style-type: none">• Create a trial account on MyBalsamiq.com (you'll be invited to group projects later, which don't require paid accounts)• Make sure you finish the readings originally assigned for this week, including Pine (which is available in the bookstore)
